PROJECTS

Astrophotography assistance Web + Mobile (Final year project | Ongoing)

- Technologies - **ASP.NET Core Web API, React JS, OpenCV, TensorFlow, Matplotlib, React native, MS SQL Server & Entity framework.**
- The system will be a complete assistant for mobile astrophotography using AI and will be able to identify celestial objects.

Ayurvedic Hospital Management System - (HND Final Project | Individual)

- Technologies - **ASP.NET Core Web API, Entity Framework, React, Bootstrap,** and **MS SQL** Server.
- The system managed patient appointments, treatments, product sales, and included a simple CMS for content updates. Utilized **Swagger** for API documentation and testing, improving hospital operations.

Two player 2D Web game

- Technologies - **ASP.NET Core Web API, Entity Framework, React JS** and **MS SQL** Server.
- This application is a 2D web game which can be played by two players using a single keyboard.

Face Recognition & Motion Detection System

- Technologies - **C#.NET** and **Emgu CV.**
- The application accurately identified faces and detected movement in real-time.

POS System

- Technologies - **C#.NET Windows Forms**
- This can be used to manage all items, customers, stock, purchase and the staff.

Frontend Development for clients
